

# Day 90 - Professional Project - Text to Speech (Converting PDFs to Audiobooks)

This is a sample text that Collins has written for me to say out.

You are free to change this file to another that you would like to convert to audio. Remember to rename that file to 'file.pdf' else, the program will generate an error.

I may refactor the code to look for any and all pdf files in its root directory but that would be in the future. Follow me to find out if and when I do this.

On Twitter, Instagram and LinkedIn @collinsezedike.

**WAGMI!**
